New coaching and leadership paradigms

This workshop explores an emergent work paradigm that is
transforming leadership and coaching approaches

*Eco-Leadership and Network Coaching Approaches
(Western 2019, 2013)*

Mainstream approaches to coaching and leadership
focus on maximising an individual's and organisation's
performance. Dr Western believes this is out-of-focus
with the dramatic changes happening in the world
today.

Triple Ecosystem Impact

Three ecosystems are disrupting our world- all
interconnected

- **Technological ecosystem** –the digital revolution and hyper-connectivity
- **Environmental ecosystem** - climate emergency and biodiversity crisis
- **Social ecosystem**- hyper-globalisation, radical economic & social change

*"Organisations are ecosystems within ecosystems"
(Western 2019)*
